

Story Title: Food shortage.
Subject Matter: Refugees.

Introduction

Am galwood Gal, I came to Kakuma when I was like 2 years old. Over the 20 years I have stay in the camp. I have experience various challenges but food shortage is one of challenge I have encountered over years.

Basically, the ratio as to which the food is being distributed over the years down the line is not sustainable ~~like~~ doesn't putting a comparison between the current food distribution agency in charge and the agency in charge of food distribution 15 years ago have got a big difference.

However, with an huge experiences over years, food shortage has led various challenges like for instance children encountered an acute nutritional benefit; young people try to find ways to survive but still nothing easy to improving their life. That's when you find a number of robbery keep increasing yearly.

Increase of young people in the street begging for food. Since there is no enough food being distributed by the agencies like in simple terms the food distributed doesn't sustain the 30 days as the agency recommended.

In process of trying to find out who are victims mostly I manage to have a dialogue with my friends & Neighbours from the youngest nation South Sudan and most of them only have one meal a day and at the same point when person get sick he/she suffered since you may find he/she haven't eaten anything whole day through.

Food shortage its been huge challenge over years down the line and still its has brought challenges such as people try to find way on how to improve their life when you find out their alot of Robbery, Early Marriages to gain wealthy.

Although, potential Refugees try hard to improve their living standards,
but as they fit into farming and plant vegetables to either sell
them but are still consuming as a meal of some.
